Description (quantify qualify, source, etc)

A chambered round cairn damaged by ploughing. The top has been reduced to reveal a central chamber with two uprights in situ. The capstone seems not to have survived.

Site visit 5/1/99. Middle of cairn excavated, forming a square interior, partly walled on E side to height of 1m. Mound of stone in middle of this c. 5m diameter. Site located in plantation, with moderate slopes to south.

Very distinct mound with remains of chambered round
 central. 4 edge set stones the largest of which is 1.6m high
 x 2.2m wide x 0.5m deep. Single edge set stone on 1/2 of slope to W of
 4 trees on S & W sides. Centre:
 No possible capstone in the vicinity. 0.6 long x 0.4 wide

Dimensions 22.2m N-S; 18.2 E-W x 1.5m high (max) 152 m OD

Siting On level ground with moderate slope to W.

Vegetation grass

Landuse pasture
